Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period **will** apply and **will** expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply **will**, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 February 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The rejection of claims 1-28 as generally set forth in the previous Office Action, mailed on 10/16/2007, under Title 35 U.S.C. 103(a) as being unpatentable over CA 2255456 (Canadian Patent) to Siray et al. is proper and stands.

Response to Amendment

2. The amendment to the Abstract by submitting a new Abstract, filed February 7, 2008, page 13, is acknowledged. As such, the objection to the Abstract as set forth in the previous Office Action is hereby withdrawn.

Response to Arguments

3. Applicant's arguments filed February 7, 2008 have been fully considered but they are not persuasive.

4. Applicants have argued that in view of the newly submitted Declaration, the disclosure of the density in the range of 7-140 g/L by Siray et al. (CA 2255456), was inaccurate and Siray et al. do not teach or suggest silica having a density of less than 70 g/L.

The Examiner, respectfully, disagrees and submits that regarding the Declaration expressing an inaccuracy in the Canadian Patent (equivalent US Patent No. 6,383,280), by only one of the inventors, Dr. Mustafa Siray, of said patent stating that the disclosure

Art Unit: 1793

of density of 7-140 g/L was inaccurate and density of said silica could not go below 70 g/L is not sufficient.

5. Nevertheless, due to the lack of any certificate of correction in any of the prior art and references, the Canadian Patent (CA 2255456), the US Patent No. 6,383,280 and other priority documents and applications, there is no hard evidence to prove to the Office that said disclosure was inaccurate.

The Applicants may provide another publication that references the various patents and states that there is a typographical error regarding the density range of 7-140 g/L which expressly indicates that the density could not have been below 70 g/L. Otherwise, the Applicants may, also, provide proofs that the alleged typographical error was sufficiently impossible via test results. Such proofs will receive further considerations.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1793

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
